**PROFESSIONAL PRACTICE AND ETHICS  
(COLLEGE EXAMINATION IN FINAL YEAR)**

**Total -15 HRS**

**COURSE DESCRIPTION:**

This subject would be taught in continuum from first year to final year. An exam in theory would be conducted only in final year. Professional and ethical practice curriculum content addresses the Knowledge, Skills and Behaviors required of the physiotherapist in a range of practice relationships and roles. The course will discuss the role, responsibility, ethics administration issues and accountability of the physical therapists. The course will also cover the history and change in the profession, responsibilities of the professional to the profession, the public and to the health care team. This includes the application of professional and ethical reasoning and decision-making strategies, professional communication.

**OBJECTIVES:**

**At the end of the course the candidate will be compliant in following domains:**

**Cognitive:**

- a. Be able to understand the moral values and meaning of ethics
- b. Will acquire bedside manners and communication skills in relation with patients, peers, seniors and other professionals.

**Psychomotor:**

- a. Be able to develop psychomotor skills for physiotherapist-patient relationship.
- b. Skill to evaluate and make decision for plan of management based on sociocultural values and referral practice.

**Affective:**

- a) Be able to develop behavioral skills and humanitarian approach while communicating with patients, relatives, society at large and co-professionals.
- b) Be able to develop bedside behavior, respect & maintain patients' confidentiality.

## PATHOLOGY

[DIDACTIC –50 HRS]

### COURSE DESCRIPTION:

Students will develop an understanding of pathology underlying clinical disease states involving the major organ systems and epidemiological issues. Students will learn to recognize pathology signs and symptoms considered red flags for serious disease. Students will use problem-solving skills and information about pathology to decide when referrals to another health care provider or alternative interventions are indicated. Students will develop the ability to disseminate pertinent information and findings, and ascertain the appropriate steps to follow. The course more deals with structural impairments as an important part in ICF Classification.

### OBJECTIVES:

At the end of the course, the candidate:

**D. Y. Patil Education Society, Kolhapur**  
**Institution Deemed to be University**

**Cognitive:**

- a. Will have sound knowledge of concepts of cell injury & changes produced by different tissues, organs and capacity of the body in healing process.
- b. Acquire the knowledge of general concepts of neoplasia with reference to the Etiology, gross & microscopic features, & diagnosis, in different tissues, & organs of the body.
- c. Acquire knowledge of common immunological disorders & their resultant effects on the human body.

**Psychomotor:**

- a. Recall the Etiology–pathogenesis, the pathological effects & the clinico–pathological correlation of common infections & non-infectious diseases.
- b. Understand in brief, about the common Haematological disorders & investigations necessary to diagnose them.
- c. Correlate normal & altered morphology of different organ systems in different diseases needed for understanding disease process & their clinical significance

## PHARMACOLOGY

[DIDACTIC – 50 hrs]

### COURSE DESCRIPTION:

This course covers the basic knowledge of Pharmacology including administration, physiologic response and adverse effects of drugs under normal and pathologic conditions. Topics focus on the influence of drugs in rehabilitation patient/client management. Drugs used in iontophoresis and phonoporesis will be discussed in detail.

Sr. No.	Topics	Didactic Hours

### OBJECTIVES:

At the end of the course, the candidate will be able to:

#### Cognitive:

- Describe Pharmacological effects of commonly used drugs by patients referred for Physiotherapy; list their adverse reactions, precautions, contraindications, formulation & route of administration.
- Identify whether the pharmacological effect of the drug interferes with the Therapeutic response of Physiotherapy & viceversa
- Indicate the use of analgesics & anti-inflammatory agents with movement disorders with consideration of cost, efficiency, & safety for individual needs.

#### Psychomotor:

Get the awareness of other essential & commonly used drugs by patients- The bases for their use & common as well as serious adverse reactions.

1. Case presentation will be taken at the end of preliminary examination
2. Case presentation: History taking: 20 marks + Communication skills: 20 marks

**Total: 40 marks**

**INTERNAL ASSESSMENT:**

1. Two exams – Terminal and preliminary examination (Theory only) of 40 marks each  
**TOTAL - 80 marks**
2. Internal Assessment to be calculated out of 10 marks (Theory only)
3. Internal assessment as per University pattern.

## **KINESIOLOGY**

**DIDACTIC- 80 HRS**

### **COURSE DESCRIPTION:**

This course is based on anatomical, physiological & related kinesiological principles for normal human movement. Students have the opportunity to develop and acquire understanding of kinesiological responses for the efficacy in various kinesiotherapeutic applications.

## **KINESIOTHERAPY**

Didactic-80 Hrs + Practical/ Laboratory-160 HRS [TOTAL - 240 HRS]

### **COURSE DESCRIPTION:**

This course is based on anatomical and physiological & related kinesiological principles for normal human movement and for the efficacy in the assessment methods for mobility, muscle strength. Students have the opportunity to develop and acquire understanding of physiological responses to various types of training and develop skills of exercise programs (on models). Exercise components of muscle strength, flexibility, balance, breathing and gait are examined. Evidence of appropriate, safe and effective exercise design and proper exercise biomechanics and prescription parameters are addressed with all interventions.

### **OBJECTIVES:**

At the end of the course, the candidate will be able to

#### **Cognitive:**

Describe the Biophysical properties of connective tissue, & effect of mechanical loading, & factors which influence the muscle strength, & mobility of articular & periarticular soft tissues.

#### **Psychomotor:**

1. Apply the biomechanical principles for the efficacy in the assessment methods for mobility, muscle strength
2. Acquire the skill of subjective and objective assessment of individual & group muscle strength
3. Acquire the skills of subjective and objective methods of muscle strengthening
4. Describe the physiological effects, therapeutic uses, merits / demerits of various exercise modes including Hydrotherapy
5. Demonstrate various therapeutic exercises on self; & acquire the skill of application on

## **ELECTROTHERAPY**

Didactic –100 hrs+ Practical / Laboratory –200 hrs [**TOTAL - 300 HRS**]

### **COURSE DESCRIPTION:**

This course tends to explore fundamental skills in application of electrotherapeutic modalities and knowledge of indications, contraindications and physiological principles needed for appropriate patient care. It includes topics such as Electrical stimulation, T.E.N.S., Iontophoresis, Ultrasound / Phonophoresis, Diathermy and Electro diagnostic testing etc.

### **OBJECTIVES:**

**At the end of the course, the candidate will be able to:**

#### **Cognitive:**

1. Acquire the knowledge about the physiology of pain, Pain pathways & Methods of pain modulation, selection of appropriate modality for Painmodulations.
2. Describe the Physiological effects, Therapeutic uses, indication & contraindications of various Low/ Medium & High Frequency modes /Actinotherapy
3. Describe the Physiological Effects & therapeutic uses of various therapeutic ions & topical pharmaco-therapeutic agents to be used for the application of iontophoresis & sono/phonophoresis

#### **Psychomotor:**

1. Acquire the skills of application of the Electro therapy modes on models, for the purpose of Assessment & Treatment.
2. Acquire an ability to select the appropriate mode as per the tissue specific & area specific application.
